

## **FAÇADE DESIGN MANAGER**

Walsin are one of the region's leading specialist architectural glazing contractors having been established for over 20 years and continue to expand throughout the UK & Ireland on a variety of contracts including retail, commercial, educational and healthcare. Throughout our history, we have built and developed the business by delivering quality bespoke solutions to our clients, which has developed into consistent repeat business on high profile projects. Due to growth & expansion of the company we have an immediate permanent requirement for a Facade Design Manager who specialises in curtain walling and glazing.

### **The Role**

As a Facade Design Manager you will be tasked with managing a diverse range of detailed design drawings for some of the most architecturally sophisticated buildings in the commercial construction industry.

Reporting to the Technical Manager you will provide direction and support to the Design Office, Production and Project Management teams throughout the design, production and installation stages of each project.

Managing a busy team you will be involved in the day to day planning / scheduling of works. You will attend Design Team and Site meetings with clients, architects and other subcontractors as and when the need arises. This will require an understanding for the part played in the overall project communication with the entire team and the ability to exceed expectation.

### **The Person**

The successful applicant will have at least five years' experience in a similar role and must be able to demonstrate their ability to manage a busy Design Office.

A 3<sup>rd</sup> level qualification in a construction related discipline is desirable.

Experience of curtain walling, windows and doors, shop fronts, frameless bolt glass assemblies and roof glazing, rain screen and cladding.

Schuco, Aluprof, Metal Technology Aluminium glazing systems experience would be advantageous.

Understanding of basic building physics including ventilation, solar gain control, thermal insulation, glare control, along with fire and smoke control.

Good awareness of the challenges and constraints of the other design disciplines such as Architectural, Structural, M&E Services, Fire Engineering and Acoustics.

Experience of RIVET Architecture and fulfilling the requirement laid out In BIM would be advantageous.

### **The Opportunity**

This is an excellent opportunity to join one of the UK's leading glazing and facade companies, offering the chance to work on landmark and unique projects throughout the U.K & Ireland. In return you will be rewarded with a competitive annual salary and the opportunity for career progression in a local company that is going from strength to strength, with a strong reputation among the local and national main contractors.

### **Benefits**

Highly competitive remuneration package, commensurate with experience.
